# Intelektualno vlasništvo u istraživanju lijekova i biomedicini

**Donatella Verbanac**

Centar za translacijska i klinička istraživanja  
Sveučilište u Zagrebu Medicinski fakultet

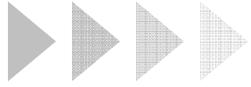

## Trenutno stanje u farmaceutskoj industriji

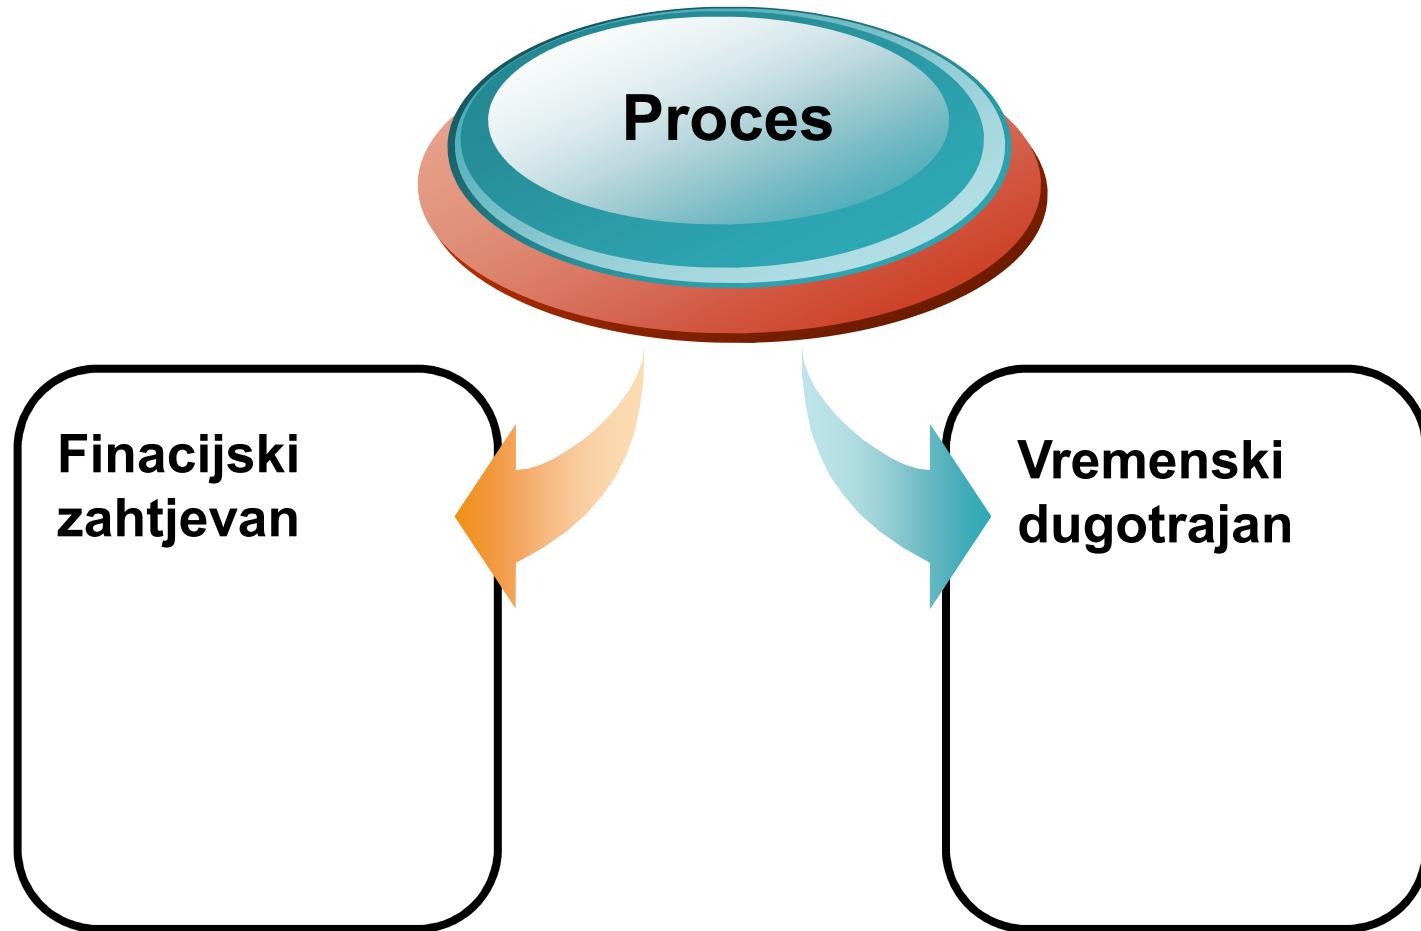

Uspjeh se mjeri po broju lijekova koji zarađuju >\$1 milijarde

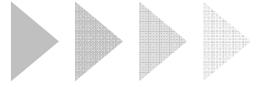

Pritisak je povećan radi očekivanja investitora i povećane konkurencije

Lijekovi koji su nekad predstavljali osnovu profita (tzv. *blockbusters*) vise nisu dovoljni za očuvanje poslovanja zbog gubitka prava intelektualnog vlasništva

# Istraživanje lijekova

## Visoki troškovi razvoja pojedinih ideja

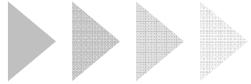

Novi avion	€ 50 Mrd.
Novi automobil	€ 3 - 6 Mrd.
Novi kompjuterski chip	€ 1 Mrd.
Novi lijek	€ 0,8 – 1,2 Mrd.

**1,000,000,000** CHF investment  
**7,000,874** hours of work  
**6,587** experiments  
**423** researchers  
**1** medicine

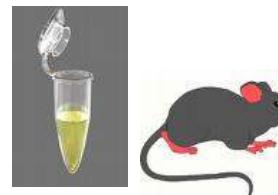

### Razvoj proizvoda

Skup proces i relativno podložan kopiranju - **visok rizik (piratskog) preuzimanja** -  
1/10 - 1/100 troškova ukupnog razvoja proizvoda

# Put nastanka novog lijeka

Osnivanje projektnog tima i definiranje ciljeva

Sinteza novih spojeva ili selekcija iz postojeće baze spojeva

Spojevi testirani *in vitro* i *in vivo* - rezultati upotrijebljeni za selekciju najboljeg kandidata

Formulacija, stabilitet «scale-up» sinteza, dodatno testiranje neškodljivosti u životinja

Lijek odobren za marketing i prodaju

Tvrtka podnosi zahtjev za IND (Investigational New Drug) ili IMPD (Investigational Medicinal Product Dossier)

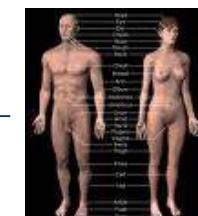

Regulatorne agencije

Cjelokupan razvoj traje 10-15 godina

Tvrtka podnosi zahtjev za NDA (New Drug Application)

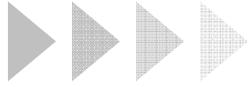

Faza III: velika klinička ispitivanja na mnogo pacijenata

Faza II: studije na pacijentima (učinkovitost)

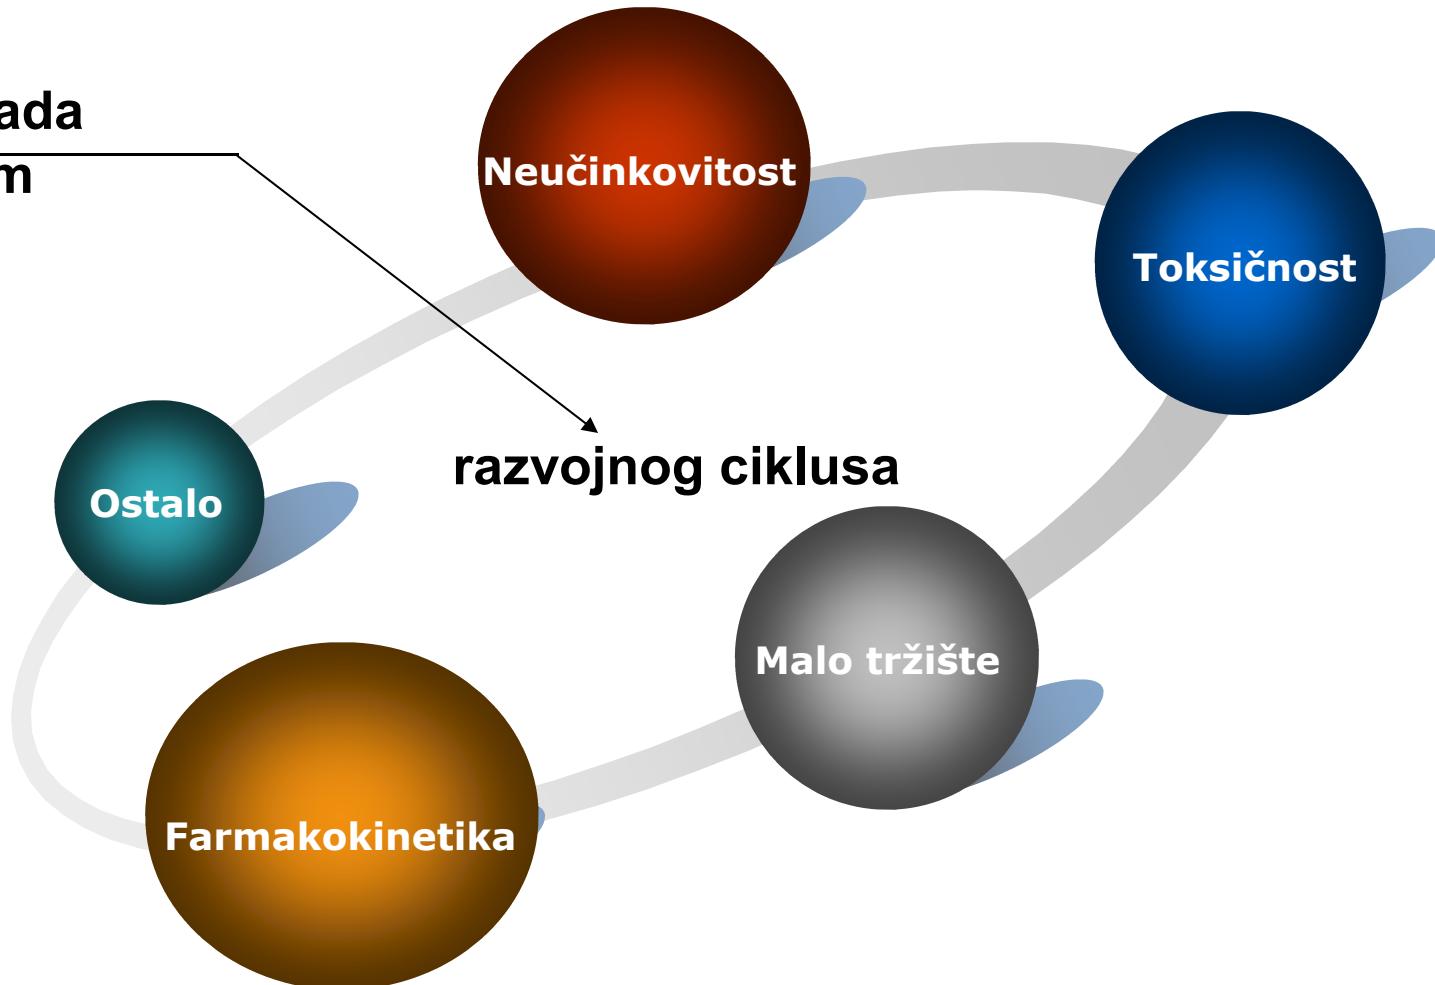

Faza I: studije na zdravim dobrovoljcima (tolerancija i doza)

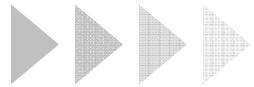

# Razlozi prekida razvoja nekog lijeka

Bilo kada  
tijekom

## Reasons for Attrition During Drug Development

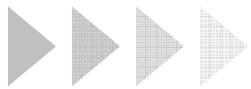

1990

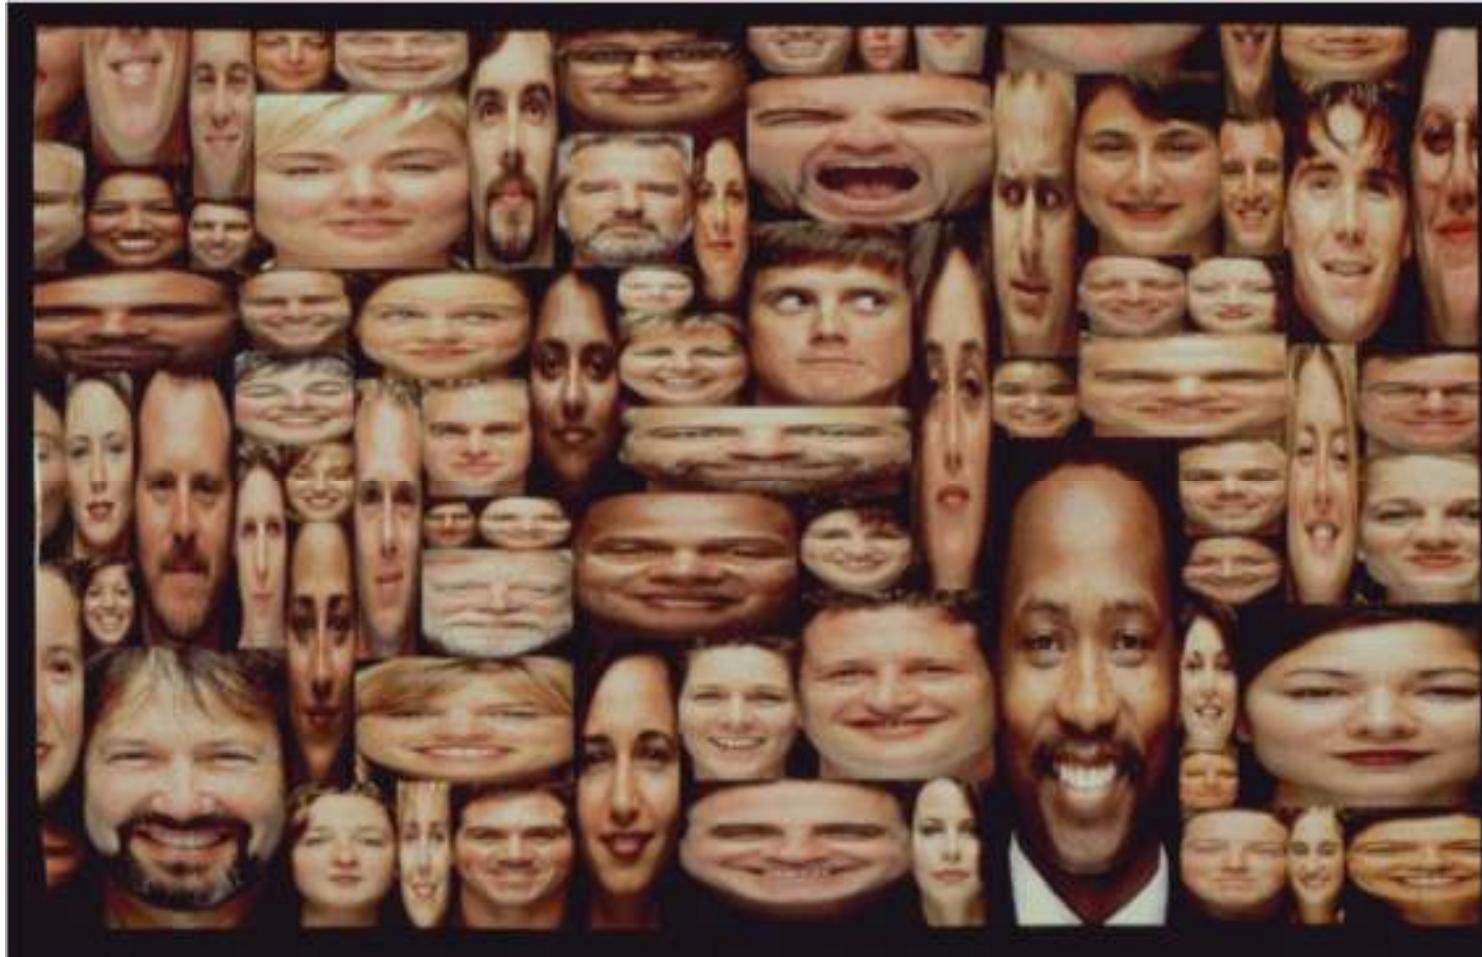

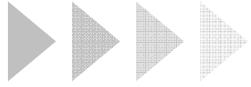

2000-2010

- PK/bioavailability
- Clinical safety
- Efficacy
- Commercial
- Toxicology
- Miscelaneous

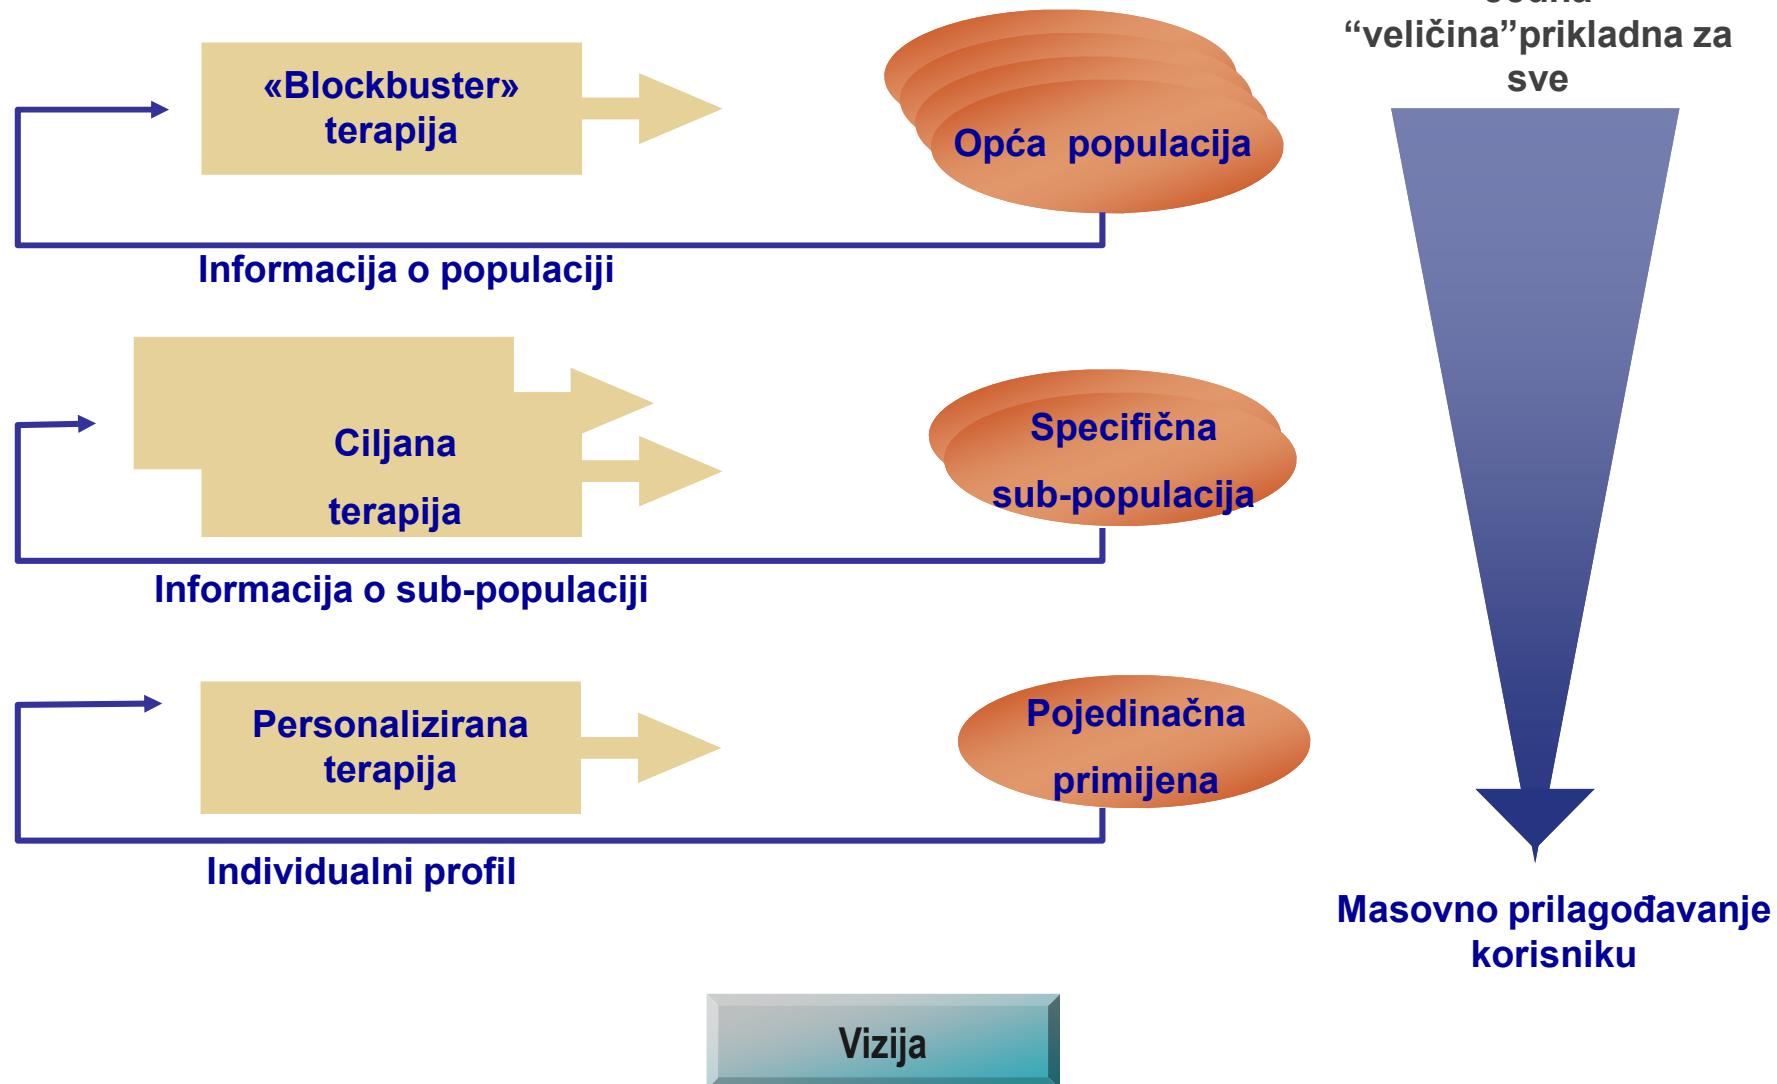

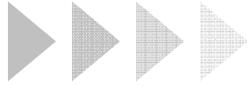

## Krajnji korisnici su ljudi

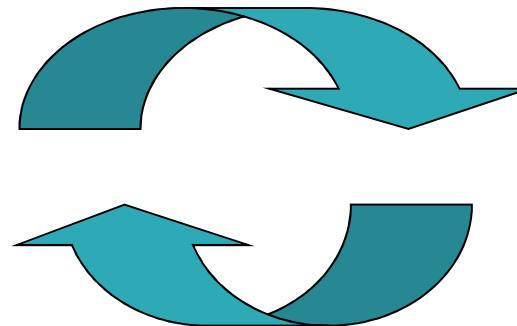

# Novi pristup razvoju lijekova

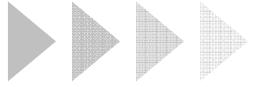

# Translacijska istraživanja

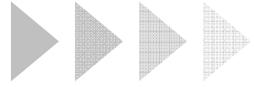

- ❖ Omogućuju dvosmjernu komunikaciju između bazičnih istraživača i medicinskih djelatnika na klinici i u praksi
- ❖ Omogućuju primjenu eksperimentalnih podataka preko kliničkih ispitivanja do konačnog korisnika – pacijenta
- ❖ Omogućuju povratnu informaciju dobivenu iz iskustvenih podataka i opažanja s klinike, te dobivanje uzoraka za rad bazičnih istraživača

Biomedicina i industrija lijekova

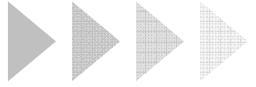

# VAŽNOST PATENTA

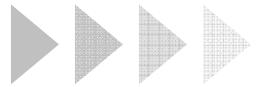

# Aspirin

- ❖ U antičkoj Grčkoj Hipokrat je ženi tijekom poroda dao čaj lista vrbe kako bi joj umanjio osjećaj boli
- ❖ 1823 - iz vrbe je izolirana aktivan tvar i nazvana **salicin**
- ❖ 1859: Njemački kemičar Hermann Kolbe sintetizira salicilnu kiselinu
- ❖ 1897: Patent - *Synthesis of acetyl salicylic acid/aspirin* – izumitelj – kemičar i farmaceut **Felix Hoffmann** Odjel *Farbenfabriken* - Elberfeld, Njemačka)
- ❖ 1899: Aspirin® registracija naziva pri Kaiserliches Patentamt u Berlin
- ❖ 1950: Guiness Book, 1969 Apollo 11, 1971 MOA farmakolog Sir J.R.Vane

# Lijepi primjer...dobrog patenta

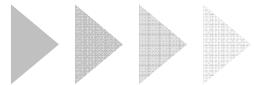

## Izumitelji - Azitromicina

**Gabrijela Kobrehel  
Slobodan Đokić  
Gorjana Lazarevski  
Zrinka Tamburašev**

# Azythromycin - Zythromax

United States Patent [19]

Kobrehel et al.

[11] Patent Number: 4,517,359

[45] Date of Patent: May 14, 1985

[54] 11-METHYL-11-AZA-4-O-CLADINOSYL-6-O-DESOSAMINYL-15-ETHYL-7,13,14-TRIHYDROXY-3,5,7,9,12,14-HEXAMETHYLOXACYCLOPENTADECANE-2-ONE AND DERIVATIVES THEREOF

[75] Inventors: Gabrijela Kobrehel; Slobodan Djokic, both of Zagreb, Yugoslavia

[73] Assignee: Sour Pliva farmaceutska, kemijska prehrambena i kozmeticka industrija, n.s.o., Zagreb, Yugoslavia

[21] Appl. No.: 304,481

[22] Filed: Sep. 22, 1981

[30] Foreign Application Priority Data

Mar. 6, 1981 [YU] Yugoslavia 592/81

[51] Int. Cl.<sup>3</sup> C07H 17/08

[57] ABSTRACT

11-Methyl-11-aza-4-O-cladinosyl-6-O-desosaminyl-15-ethyl-7,13,14-trihydroxy-3,5,7,9,12,14-hexamethyl-oxacyclopentadecane-2-one and derivatives thereof, such as the 13,14-carbonate and C<sub>1</sub>-C<sub>3</sub>-alkanoyl derivatives thereof. The compounds exhibit antibacterial activity.

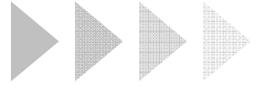

1 Claim, No Drawings

What is claimed is:

1. N-methyl-11-aza-10-deoxy-10-dihydro erythromycin A.

\* \* \* \*

❖ Tvrđnja/Claim:

# Lijepi primjer...učinkovitog patenta

# The United States

The Director of the United States  
Patent and Trademark Office

Has received an application for a patent for  
a new and useful invention. The title and  
description of the invention are enclosed.  
The requirements of law have been com-  
plied with, and it has been determined that  
a patent on the invention shall be granted  
under the law:

## (12) United States Patent Vukicevic et al.

### (54) WHOLE BLOOD-DERIVED COAGULUM DEVICE FOR TREATING BONE DEFECTS

or (c)(1), subject to the payment of main-  
tenance fees as provided by 35 U.S.C. 41(b).  
See the Maintenance Fee Notice on the  
inside of the cover;

A handwritten signature in black ink that reads "David J. Kappos".

Director of the United States Patent and Trademark Office

## United States Patent Vukicevic et al.

(10) Patent No.: US 8,197,840 B2  
(45) Date of Patent: Jun. 12, 2012

### (54) WHOLE BLOOD-DERIVED COAGULUM DEVICE FOR TREATING BONE DEFECTS

(75) Inventor: **Slobodan Vukicevic**, Zagreb (HR);  
**Ljovorka Grgurevic**, Zagreb (HR);  
**Bernhard Oppermann**, Medway, MA  
(US)

(73) Assignee: **Genera Istrazivanja d.o.o.**, Kallinica  
(HR)

(14) Notice: Subject to any disclaimer, the term of this  
patent is extended or adjusted under 35

Iznalaženje novih  
aspekata zaštite  
(follow-up izumi)

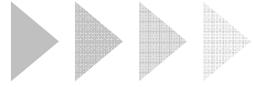

# Faze u dobivanju patenta

Zaštita u fazi  
prijave

Obrana prijave  
patenta

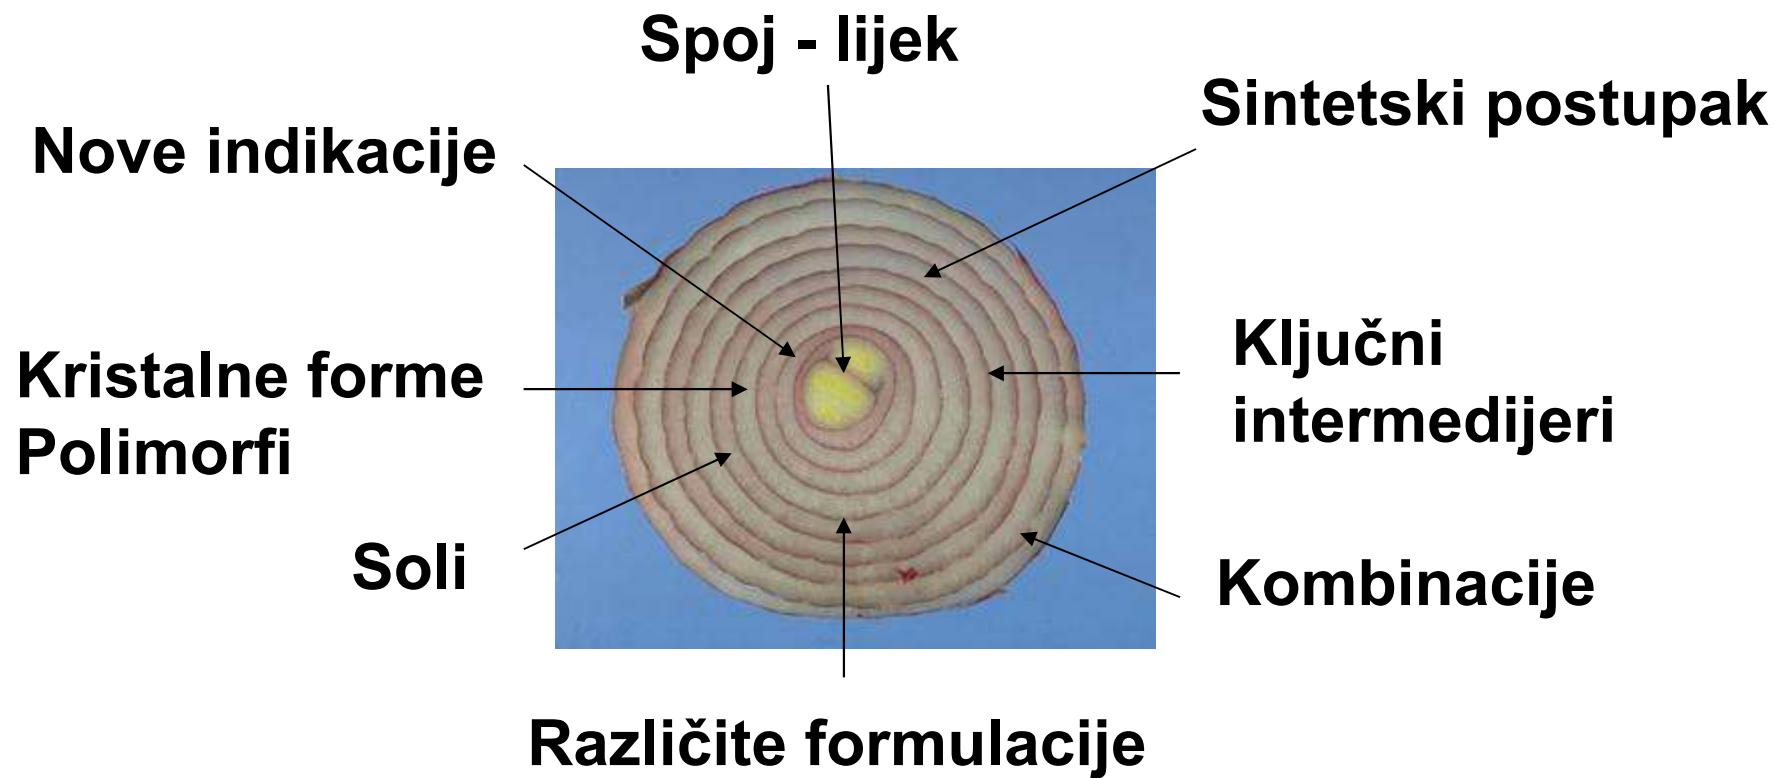

Odobren patent

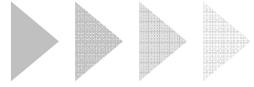

# Patenti u farmaceutskoj industriji

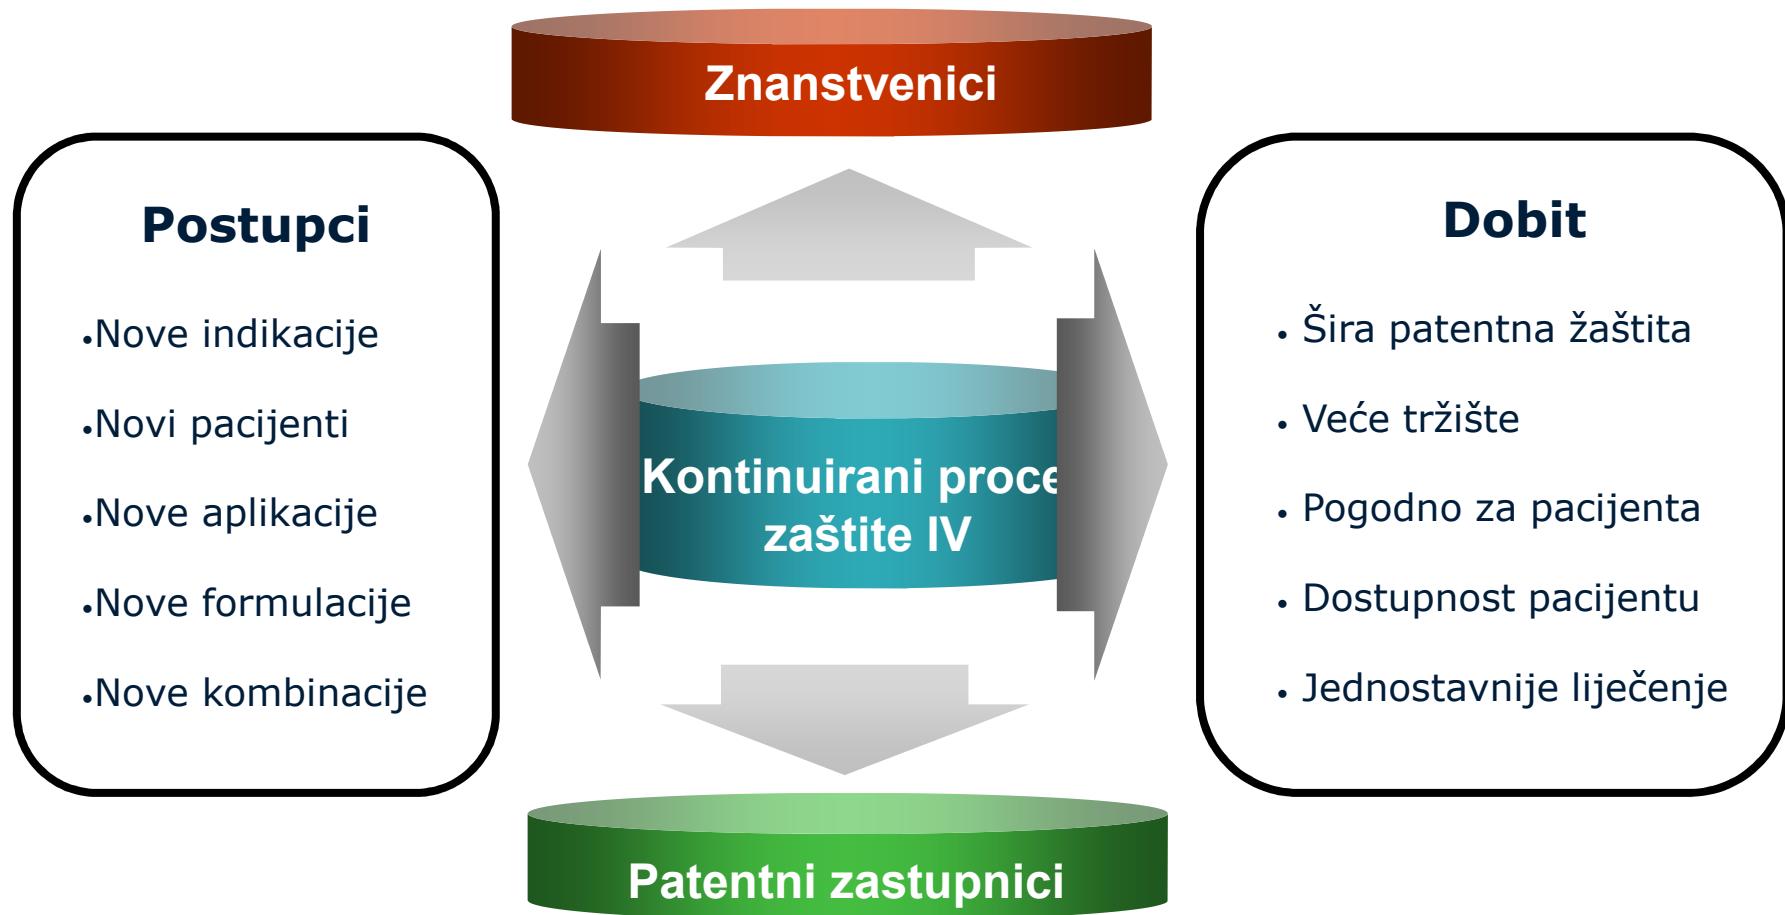

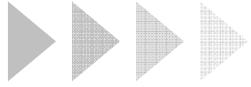

## “Onion” Approach

# Produljenje trajanja zaštite patenta nekog lijeka

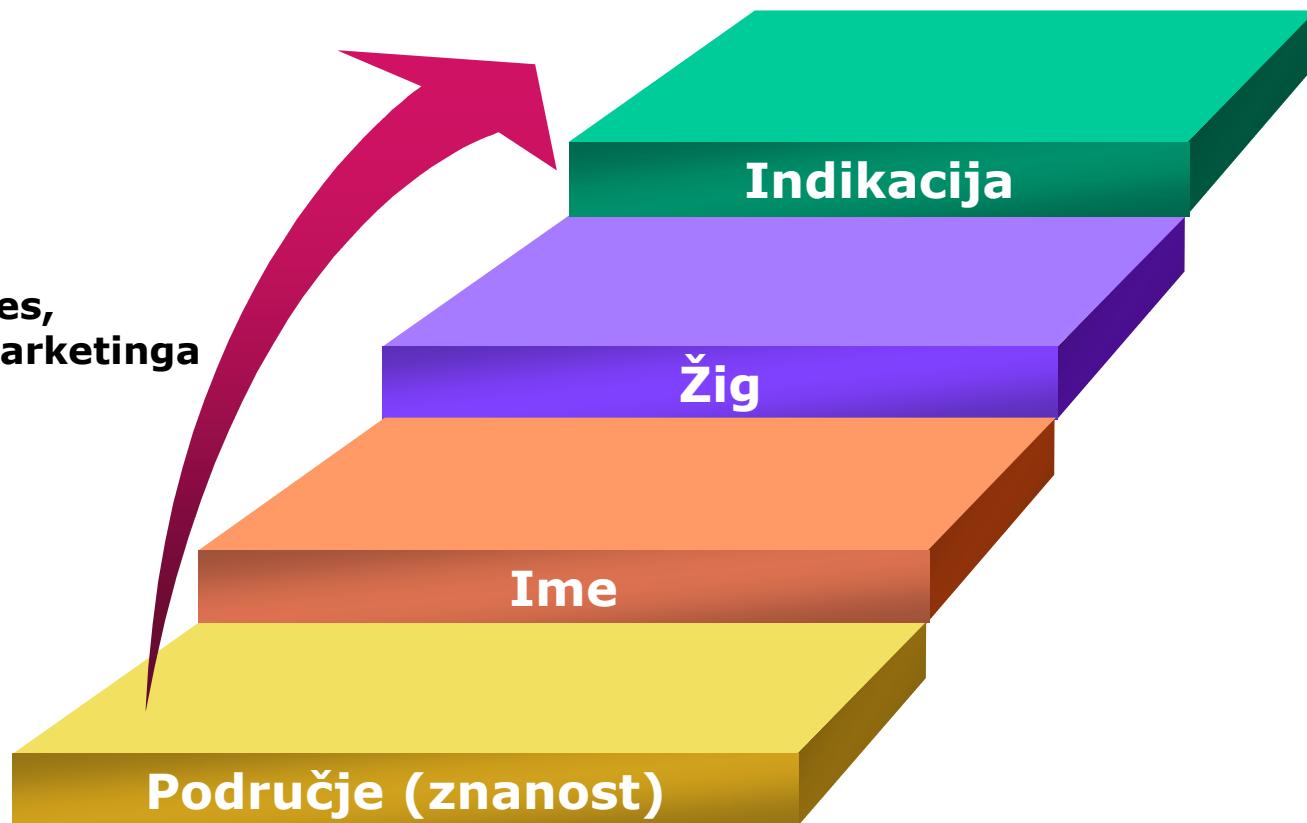

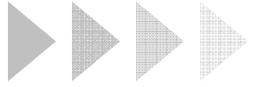

# Što se sve kod lijeka može zaštititi?

Kontinuiran proces,  
važna je uloga marketinga

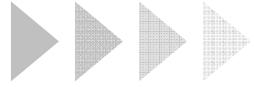

## Osnovna obilježja zaštite lijeka

- ❖ Odjel koji se bavi razvojem poslovanja morao bi raditi zajedno s patentnim zastupnicima kako bi već u fazi određivanja strategije razvoja mogao procijeniti u kojem području istraživanja postoji prostor za nove zaštite
- ❖ Već kod postupka prvih registracija lijeka treba znati kako će se štititi ime, te teritorijalno pravo žiga (žig je pravo, ali nije i obaveza)
- ❖ U postupku registracije lijek treba imati svoj naziv, potrebno je oko godinu dana da se naziv zaštiti
- ❖ Postoje baze zaštićenih imena lijekova koje je potrebno pretražiti kad se odabire ime za novi lijek

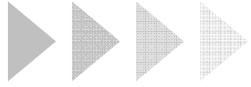

# Što s novim indikacijama i nazivima?

- ❖ Kod novih indikacija odabir novog imena ili zadržavanje starog naziva odluka je same tvrtke
- ❖ U pravilu bi za potrebe novih indikacija u **generičkom poslovanju** ime moralo biti za najmanje tri slova različito od originalnog
- ❖ Postoji i tzv."Umbrella" zaštita naziva proizvoda pojedinih tvrtki (primjer PLIVA: **Plicet**, **Plibex**, **Plivadon...**)
- ❖ **Primjer I:**
  - Finasterid (generički naziv)
  - Lijek za prostatu - Prostide ("brand" ime)
  - Nova indikacija – alopecija – novi naziv (Propecia)
    - Može se odabrati i novo ime za neka nova tržišta (SAD i EU mogu imati različite "brand" nazine)
- ❖ **Primjer II:**
  - Sildenafil (generički naziv)
  - Lijek za plućnu arterijsku hipertenziju – Revatio
  - Lijek za erektilnu disfunkciju – Viagra (zaštićen i oblik tableta)
- ❖ **Primjer III:**
  - Azitromicin (generički naziv)
    - Teritorijalna zaštita imena
      - Sumamed
      - Zytromax
    - Isti nazivi koriste se sad i za razne indikacije

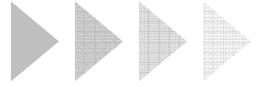

## Patent Term Extensions i pedijatrijska inicijativa

- ❖ Europa – **Supplementary Patent Certificates (SPC)**
  - Hrvatska je usvojila svjedodžbu o dodatnoj zaštiti za lijekove namijenjene ljudima ili životinjama i sredstva za zaštitu bilja; stupila je na snagu pola godine nakon ulaska Hrvatske u EU
- ❖ SAD – Hatch-Waxman Patent Term Extensions
- ❖ SPC omogućuje maksimalno traje 5 godina i stupa na snagu odmah nakon isteka temeljnog patenta
- ❖ Svjedodžba se izdaje na zahtjev nositelja patenta u roku od 6 mjeseci od datuma izdavanja odobrenja za stavljanje u promet, a ako je odobrenje izdano prije priznanja temeljnog patenta, u roku od 6 mjeseci od objave priznanja patenta
- ❖ U slučaju primjene u pedijatriji – **produljenje trajanja patenta za 6 mjeseci**

## Jedinstvenost podataka istraživanja i razvoja lijeka (*data/market exclusivity*)

- ❖ Administrativna mjera koju provode agencije za lijekove
  - Klinička istraživanja traju više godina i troše najviše sredstava;
  - Jedinstveni rezultat predstavlja čitav niz dokumenata/rezultata koji bivaju istraživani od regulatornih tijela kako bi se ishodile potrebne dozvole
  - Generičke tvrtke moraju ipak zasnovati svoja usporedna istraživanja na dobivenim rezultatima originatora
- ❖ Traje **8 godina**
- ❖ Razdoblje zaštite tržišta - nakon izdavanja prve dozvole za stavljanje na tržište originalni lijek u kome se generički lijek ne može staviti u promet
  - Traje **(2 (+1) god)**

# Pitanja !
